

COVID – 19 Virus Update

March 27, 2020

Our top priority is the health and well-being of our patients and staff. We are welcoming patients regularly as of now, and we would like our patients to know we are taking every precaution possible to maintain a safe environment!

We are fortunate enough to have UV lights and ozone treatment in our AC unit, with the fans running constantly, much like a hospital does. We have also implemented new procedure so that we may be up-to-date with the latest mandates issued by our county. They are as follows:

- We are taking all employees temperatures before work
- We are maintaining the 6 ft social distance mandate between patients by placing patients on every other treatment table and by using separate gyms with each patient as we can
- Employees are practicing the 6 ft social distancing to the best of our ability as work permits
- We have no more than 10 patients in the building at any time
- We are thoroughly cleaning all equipment and tables with hospital grade disinfectant before and after every patient
- We are focusing on wiping down all frequently touched objects such as door handles, pens, light switches, bathrooms, etc.
- We are wearing face masks while doing manual manipulations or when working near the face
- We are providing hand sanitizer throughout the facility for patient and staff use

We are keeping a close watch on the situation and are in contact with the Health Department. We will continue to monitor this situation with everyone's best interest in mind and update you as needed.

Please do NOT come into the clinic if you are feeling sick or have a fever. There will not be any cancellation fees. Please let us know as soon as possible if you need to cancel.
