

Covid Guideline

December 8, 2021

We are continuing to adhere to CDC guidelines.

Masks are required within this Healthcare Facility.

- We are continuing to wipe down all machines, equipment, and tables between patients.
- We utilize a hospital grade disinfectant on all our equipment and surfaces
- We have UV lights in our air conditioners to assist with reducing the transmission of any viral infections.
- We are working with our patients within their comfort levels and do have private offices in which we can perform some activities of physical therapy.
- We are working to vary the treatments in order to assist with some distancing although distance is not always capable

Our goal is to continue care safely while maintaining CDC guidelines.

We are here to assist and keep you out of the hospital as pain can be effectively treated with Physical Therapy.
